Hey I'm Andrea

I've been working in Cosmetic Tattooing since 2017. Before that, I spent over 15 years as a web and graphic designer, so creativity, design and art have always been my passions.

I'm a single mum of 4 teenagers, so I understand the challenges of motherhood, budgeting and multitasking. I started my business from a small room in my home in 2017 and then opened a salon in Rooty Hill in 2022.

Making people smile brings me joy. Working in this industry has allowed me to make a positive impact on clients' self-esteem.

MY APPROACH

In cosmetic tattooing, my approach is all about keeping things natural. I prefer working closely with your natural shape and colour.

I don't like to start too dark initially, as we can always go darker in a touch-up. Similarly, I stick closely to your natural shape because we can make it thicker later, but going thinner is more challenging.

I take an easy-going approach to minimise the chance of you feeling overwhelmed after your appointment.

PROCEDURE

When you come in for your appointment, we'll discuss the shape, colour and your expectations for the treatment. Not all skin types are suitable for every cosmetic tattooing service.

After that, we'll apply a numbing agent before mapping out the area.

Once we've created the perfect shape and you're satisfied with it, we'll move on to the tattooing process.

The entire appointment typically lasts about 1.5-2 hours from beginning to end.

WHAT IS COSMETIC TATTOOING

Cosmetic Tattooing, also known as 'Micropigmentation,' is a widely accepted cosmetic procedure that involves carefully placing safe colour pigments into the skin's dermis layer.

This instantly enhances appearance, facial definition and often has a long-lasting effect. In simple terms, it's a cosmetic treatment that gives your eyes, brows and lips a soft natural look, resembling perfectly applied makeup or subtle enhancements.

All cosmetic tattooing gradually fades over time due to individual factors. Cosmetic tattooing requires expertise, skill, trust, passion, compassion, skin knowledge and artistic flair. It's more than just an extension of beauty therapy.

BROW STYLES

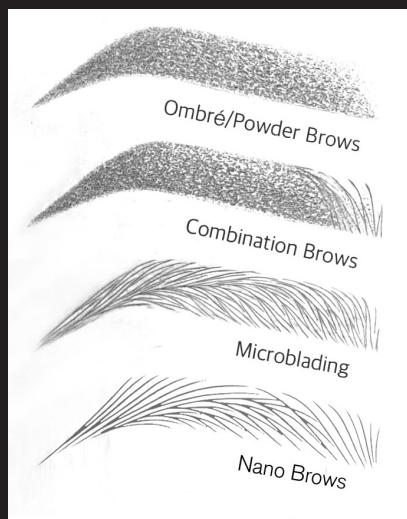

OMBRE/POWDER BROWS: This technique involves shading the eye brows to create a soft, powder-like finish. It's more filled-in compared to other methods, giving a similar look to brow makeup.

MICROBLADING: Microblading uses fine needles on a blade to create hair-like strokes, mimicking natural eyebrow hairs. It provides a more defined and realistic look, suitable for those wanting a natural appearance.

NANO BROWS: Nano brows use a similar concept to microblading but using a machine instead of a blade. This technique can achieve a more precise result, often preferred for clients who desire a hyper-realistic look.

COMBINATION BROWS: As the name suggests, combination brows combine techniques. This involves microblading or nano strokes in the front part of the brows for a natural look, and powder shading towards the arch and tail for added definition.

Each method has its own characteristics, and the choice depends on individual preferences, desired outcome, and the expertise of the technician.

AFTERCARE

When you leave, we'll provide you with an aftercare card that explains the different stages your tattoo will go through in the coming weeks.

In the first 24 hours, your tattoo may darken and you might have a moment of concern. Rest assured that it will settle and fade by up to 30% within 1-2 weeks.

The complete healing process can take up to 4 weeks for the final result to show.

After this period, any additional changes or refinements can be done during a touch-up session.

You can book a follow-up session with us 6-12 weeks after your first tattoo appointment. We'll check your tattoo, fix any issues from the healing process and adjust if needed. If your brows heal perfectly, you might skip this but if there are gaps or you want changes, we can do that.

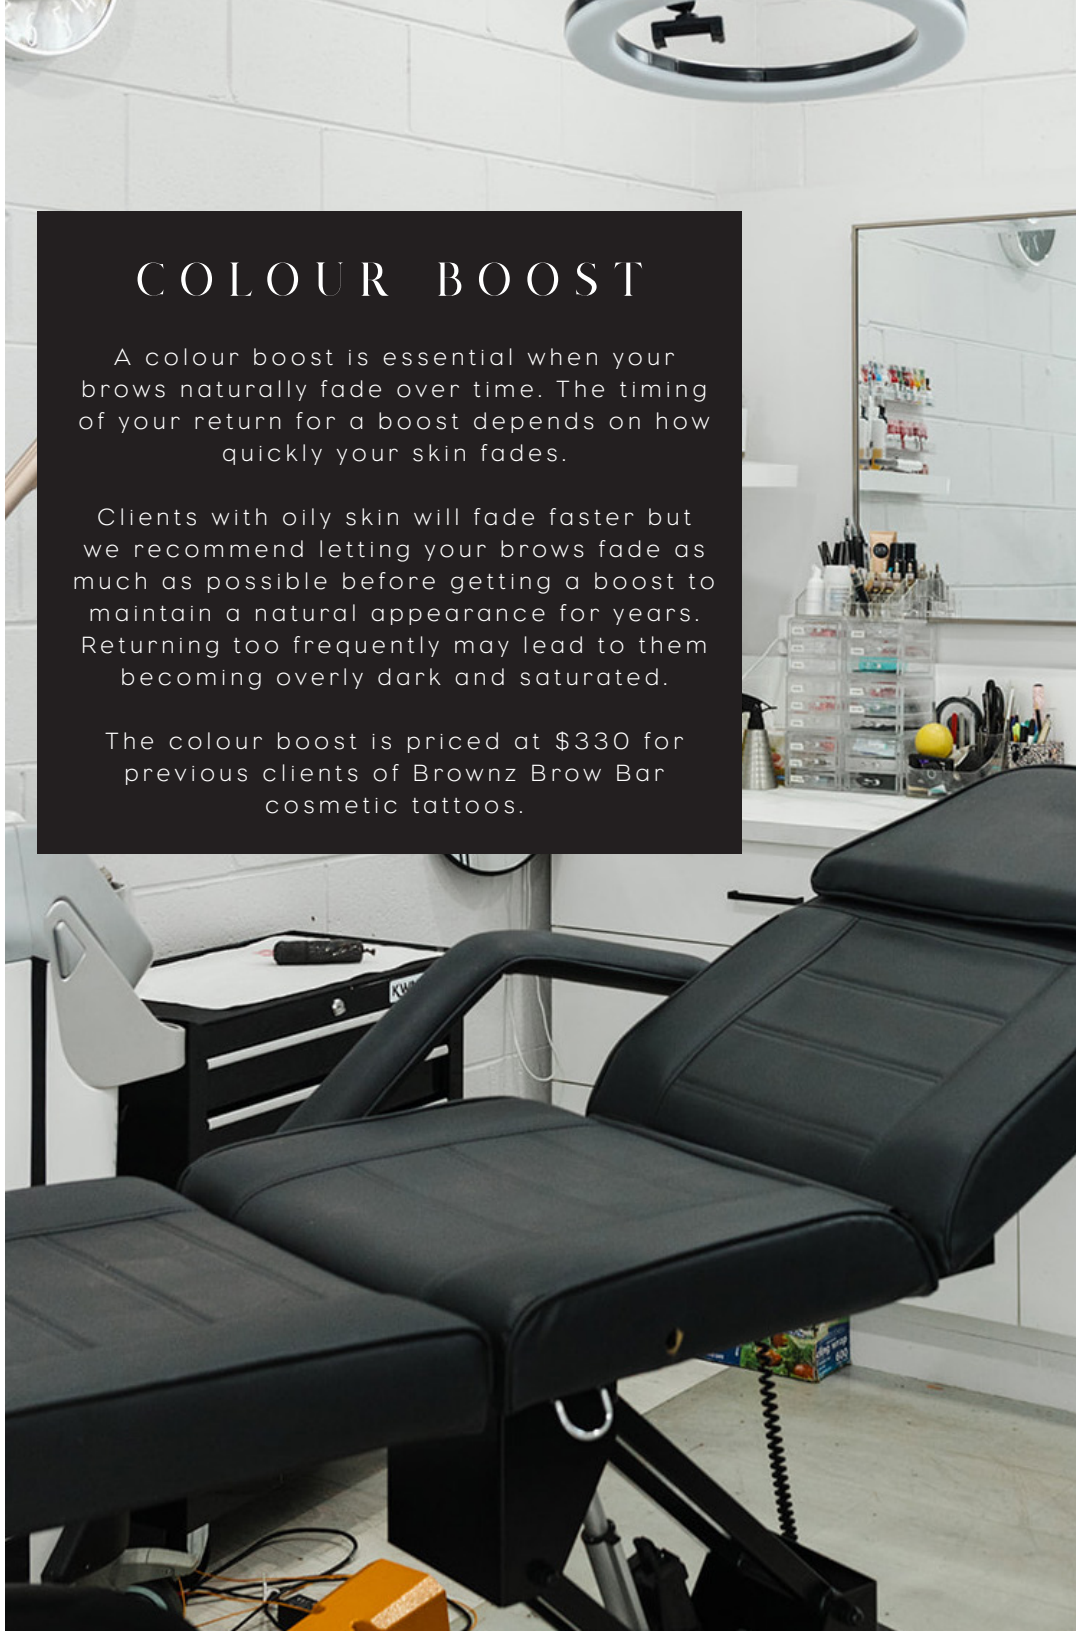

The touch-up session costs \$100.

COLOUR BOOST

A colour boost is essential when your brows naturally fade over time. The timing of your return for a boost depends on how quickly your skin fades.

Clients with oily skin will fade faster but we recommend letting your brows fade as much as possible before getting a boost to maintain a natural appearance for years. Returning too frequently may lead to them becoming overly dark and saturated.

The colour boost is priced at \$330 for previous clients of Brownz Brow Bar cosmetic tattoos.

*I look forward
to meeting you*
